

```
# example .bashrc file

# invoke the Houdini Setup Environment
cd /opt/hfs8.1.704/; source houdini_setup_bash > /dev/null; cd;

# you can now run all of the external Houdini applications

# list as colour
alias ls='ls --color'

# add $HOME/bin & Renderman paths to the Global $PATH variable
export PATH=$PATH:$HOME/bin:/usr/local/prman/bin:

# Renderfarm Access
export RENDERDB=rfnode0

# Create a Houdini $JOB
export JOB=$HOME/banana
```
